

Rodent Cortical Thickness Analysis

Install Tutorial

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

Marie Jacquemard
Neuro Image Research and Analysis Laboratories
University of North Carolina at Chapel Hill

Download

- You can download the package on NITRC :
<http://www.nitrc.org/projects/rodentthickness>
- Extract the file with command : tar -xvzf {name of package}

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

Installation

- Ubuntu 12.10

Before using the executable, install the package :

```
sudo apt-get install libjpeg62-dbg
```

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

Package Linux vtk/python

- Python with vtk installed is included in the package.
- Setup the environment variables

Bash:

```
export  
LD_LIBRARY_PATH={RodentThickness_package_v1.1-  
install_dir}/lib:${LD_LIBRARY_PATH}
```

Tcsh :

```
setenv LD_LIBRARY_PATH  
{RodentThickness_package_v1.1_with_vtk_and_python-  
install_dir}/lib:${LD_LIBRARY_PATH}
```

Necessaries Packages

- Python with vtk installed
- Rscript if you build statistics

THE UNIVERSITY
of NORTH CAROLINA
at CHAPEL HILL

Installation Python

- Python version : Python 2.6 or Python 2.7 with vtk installed
- Download python
 - Windows
www.python.org/ftp/python/2.7.5/python-2.7.5.msi
 - Mac
www.python.org/ftp/python/2.7.5/python-2.7.5-macosx10.6.dmg

THE UNIVERSITY
